

Kanpur Bhraman - Frontend MVP Overview

Pages Required:

1. LandingPage.jsx – Weather, date/time, Kanpur intro.
2. HistoryPage.jsx – Kanpur's history, culture, and heritage.
3. AttractionsPage.jsx – List of tourist places with details.
4. PlaceDetailPage.jsx – Full details of a selected place.
5. TripPlannerPage.jsx – Form for trip planning preferences.
6. ContactPage.jsx – Contact form and basic info.

Components Required:

1. Navbar.jsx – Top navigation bar (global)
2. Footer.jsx – Common footer (global)
3. PlaceCard.jsx – Display card for each place
4. FilterBar.jsx – Filter by type, age, timing, fee, tags
5. SearchBar.jsx – Search functionality
6. MapComponent.jsx – Interactive map with distance info
7. ReviewForm.jsx – Form for submitting reviews (with name & email)
8. ReviewList.jsx – Displays list of reviews
9. TripSuggestionBox.jsx – Shows auto-generated trip plan

Routes Setup:

/ → LandingPage

/history → HistoryPage

/attractions → AttractionsPage

/place/:id → PlaceDetailPage

/trip-planner → TripPlannerPage

/contact → ContactPage

Note:

All frontend components will be developed with full mobile responsiveness using Tailwind CSS. Navigation will be handled via React Router. Each page and component will be built modularly for easy scalability.
